

ruff wear's swamp cooler™

how to activate the swamp cooler for evaporative cooling

1. Soak coat completely with cold water.

2. Wring out excess.

3. Slide dog's head through neck hole and fasten the buckles at the rib cage.

4. Get on the go!

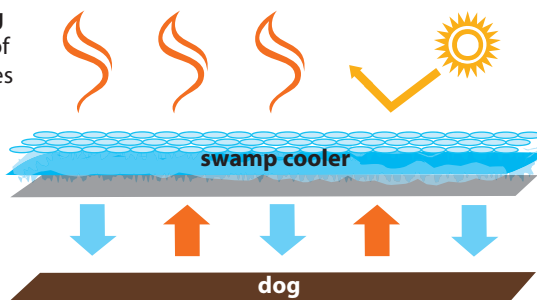

5. Recharge the coat with steps 1 through 4.

how the swamp cooler works

Evaporative Cooling

The natural process of evaporation dissipates the stored heat, chilling the Swamp Cooler.

Solar Protection

The Swamp Cooler's light fabric reflects sunlight, heat, and ultraviolet rays.

Heat Transfer

The Swamp Cooler cools the dog and absorbs the dog's heat.
